

Environmental & Safety Guidelines for Subcontractors and Visitors to TBE Facilities

Teledyne Brown Engineering (TBE) operates under an Environmental Management System to ensure that it controls, evaluates, and maintains compliance with all Federal, State, and Local environmental regulations. Our safety program is designed to comply with OSHA requirements. All visitors are encouraged to also comply and lessees, vendors, and subcontractors are required to comply with these regulations while on TBE premises. A few basic rules will ensure compliance:

- ◆ Be aware of TBE's hazardous materials in areas that you visit or where you work. Material Safety and Data Sheets (MSDSs) are available for your review.
- ◆ Be aware of safety hazards and warning signs, and perform your work in a safe manner. If an accident occurs, please cooperate with TBE or any accident-response personnel and report it to the TBE supervisor who oversees your work or to the TBE Safety & Environmental Office.
- ◆ Please have MSDSs available for any chemicals you bring onto TBE property. If you are using those chemicals in a manner that could affect TBE personnel, facilities, or the environment, notify the TBE Environmental Manager so that precautions can be taken to control any possible problems.
- ◆ Do not discharge any chemicals to the ground, to storm sewers, or to sanitary sewers without specific permission of the TBE Environmental Manager. You are encouraged to containerize and remove all of your chemicals from the TBE facility.

- ◆ With concurrence of the Environmental Manager, TBE may agree to dispose of your hazardous wastes, provided that you can fully characterize the waste in accordance with EPA regulations and TBE requirements.
- ◆ If use of your product causes hazardous air emissions, please contact the Environmental Manager for a review of required safety and environmental precautions to protect TBE employees, the facility, and the environment.
- ◆ You are required to use your chemicals and perform your work in a safe and responsible manner that protects your personnel, TBE personnel, TBE facilities, and the environment.

TBE encourages you to be a good environmental citizen and to use safe practices both while at TBE and at all times. TBE will be glad to work with you, when practical, on safety and environmental matters related to your work at or for TBE.

Please Protect Our Environment!
