TELEDYNE ENGINEERED SYSTEMS SEGMENT OVERVIEW
Teledyne Technologies is focused on companies, technologies, and specialized products with a high barrier to entry, that are advanced technically, and are not likely to commoditize. Our products span the globe and can be found from deep space to deep sea.
Teledyne Technologies Markets
2019 Sales ≈ 3.2B\(^{(a)}\)

(a) Total revenue reflects annualized sales for 2019
(b) Includes Marine Instrumentation for offshore energy and hydrographic survey, Engineered Systems for energy and power generation, and other product lines
(c) Includes Environmental Instrumentation and electronic Test & Measurement Instrumentation
(d) Other includes commercial electronics for microwave and satellite communications, industrial interconnect systems and other product lines

Teledyne Technologies, Inc.

**Instrumentation**
- Marine, environmental, and industrial mission-critical, harsh environments
- Measurement & monitoring instruments
- Power & communications for distributed instrumentation networks
- Electronic test & measurement equipment

**Digital Imaging**
- Industrial, government and medical applications
- Micro Electro-Mechanical Systems (‘MEMS’)
- High-performance sensors, cameras and systems
- Visible, infrared, ultraviolet and X-ray spectra

**Aerospace and Defense Electronics**
- Government and commercial applications
- Sophisticated component, subsystem, & communications electronics
- Defense electronics
- Data acquisition & communications for aircraft
- Harsh environment interconnects
- Components & subsystems for wireless & satellite communications
- General aviation batteries

**Engineered Systems**
- High-reliability defense, space, environmental, & energy applications
- Systems engineering, integration, test, deployment, and operations
- Complex manufacturing capability & composite parts production
- Hydrogen/oxygen generators, thermoelectric converters & radioisotope power systems
- Small turbine engines

Engineered Systems Quick Facts

- Provide Radiological Testing for Nuclear Plants
- 346K Square feet of manufacturing space
- Design and build SWCS vehicles for Navy SEALS
- Develop real-time threat testing software, EADSIM
- Supplied power source for Curiosity Rover
- Partnering in Space since the birth of the Space Program
- Provide subsea power solutions for maritime applications
- Responsible for operations on the International Space Station
- Host hyperspectral and scientific payloads on the ISS
- Provide composite parts for aviation
- Participating in ITER international nuclear fusion project
- Safely destroy chemical weapons for the government
Teledyne’s Values are the foundation for all actions and relationships with our customers, partners, employees and community.

- Integrity and Ethics
- Respect and Transparency
- Commitment and Accountability
- Leadership and Teamwork

Why Teledyne

Teledyne distinguishes itself by solving the most difficult challenges in markets that require the utmost in precision, performance and reliability.

We are the best option when:
- High degree of complexity and quality is required
- Close partnership is required
- Long-term supply and financial stability are essential
- Stringent specifications exist
- On-time delivery is a must
- The end product will encounter harsh environments

We’re probably not your best choice if your application is:
- Technically simple
- Able to be completed by many suppliers
- Solved with commodity solutions
- Driven by low price as your primary goal

• Sophisticated electronic components and subsystems and communications products
  • Defense electronics
  • Harsh environment interconnects
  • Data acquisition and communication equipment for aircraft
  • Wireless and satellite communications
Teledyne Instrumentation

- Monitoring and control instruments for marine, environmental, industrial and defense
  - Electronic test and measurement
  - Power and communications connectivity devices for distributed instrumentation systems and sensor networks deployed in mission critical, harsh environments
  - Marine navigation instruments, imaging, and a broad array of underwater vehicles
  - Subsea pipeline corrosion monitoring detectors, pressure and temperature sensors and flow integrity monitoring solutions
